

User's Guide

As the use of **Advanced Select List** is the same as the use of any other custom field defined in your JIRA project, let us describe here just a sample of the most common procedures. For more detailed information refer to [Atlassian JIRA Software documentation](#).

In the chapters below you can find information on:

- [Editing and viewing your custom field while working with the issues defined by your project.](#)
- [Searching with use of your custom field by using filters and boards.](#)
