

Installation and Licensing

Installing the add-on

1. Log into your Jira instance with administrator account.
2. Click the **Administration** dropdown icon  and choose **Add-ons**. The **Find new add-ons** screen appears.
3. Locate **Advanced Select Box** add-on at Marketplace via search. Results include add-on versions compatible with your Jira instance.
4. Click **Install** to download and install your add-on.
5. That's it! Click **Close** in the **Installed and ready to go** dialog.

Note

If you have your **Advanced Select Box** add-on installation file already downloaded, use the **Manage Add-ons** link. The **Manage Add-ons** screen gives you the possibility to upload the installation file from your local repository.

Licensing

You can use your **Advanced Select Box** add-on in three modes. See the table below for comparison:

Free trial (30 days)	Non-licensed mode	Licensed mode
All the features are enabled for trial, including importing and exporting values.	After 30 days trial expires the following features are disabled: <ul style="list-style-type: none">• importing values• exporting values Other features are fully enabled.	All the features are enabled, including importing and exporting values.
